Readers are Leaders!

There's no question that readers are leaders! What better way to promote reading than with an inspiring author visit?

My author visits are interactive, fun, and educational.

My book, Queen Kia's 8-Step Guide To Friendships, strengthens social emotional awareness, builds social skills, and promotes positive peer relationships.

Teachers and students love Queen Kia's (**Know-it-All**) spunkiness and the practical advice she shares on how to navigate the wonderful (and sometimes wavering) world of friendships.

Dr. Wade, School Psychologist

As a former librarian, and now early childhood teacher, this book is one to have! The author uses simple language while giving practical and essential advice about how children can get along with one another!

It can be read over and over and used for great discussions and lessons! The illustrations are great too!
